

### SC for DAS-1610++ in XTC mode

SC 4 DAS-1610++ is a key input for DAS-1610++ SideChain to be used in XTC mode

### HOW-TO

Insert SC 4 DAS-1610++ on the track you want to plug the side chain. I have chosen a simple clic for my test.

Insert DAS-1610++ ( stereo that's important ) on the track you want to compress by SC

Choose the KeyL to plug the side chain and the track one will be compressed by the clic...

And you can do the same on a master track ...just choose KeyL and KeyR.
